

Gear Management

Suggestions on organising and storing your DJ Equipment

Make your DJ gear into a kit

- Label every item in the kit
- Store them in plastic storage containers.
- Assign students to the same kit each time
- You know who is using what gear and students are accountable

Each kit should include

- DJ Controller Deck
- Headphones (with 1/4 inch adaptor)
- Headphone splitter
- Bluetooth speaker with aux cable to connect the speaker to the DJ deck *(to avoid latency/delay)*
- iPad *(if the school is providing this)*
- Chargers and power adaptors
